

TN SKILLS

SCRIPT -CONTROLLED ACL RESTRICT RECORD

BASED ON FIELD VALUE

PHASE 6 – PROJECT TESTING

1. EEE User Access Testing

The EEE User was impersonated and the Institution Details records were checked. The user with the bb1 role was able to view only the records where the Branch is EEE.

2. Admin Access Testing

The Admin user was impersonated and the Institution Details records were checked. The Admin user was able to view all records regardless of the branch value.

3. Create Access Testing

The bb2 role was added along with bb1. The user was able to view the EEE records and the New button was available for creating records.

4. Write Access Testing

The bb3 role was added along with bb1 and bb2. The user was able to view and edit the EEE records.

5. Delete Access Testing

The bb4 role was added along with bb1, bb2 and bb3. The user was able to view, create, edit and delete the EEE records.

6. Testing Outcome

The testing confirmed that the configured ACLs correctly control Read, Create, Write, and Delete access based on user roles and the Branch field value.
